

Congratulations!

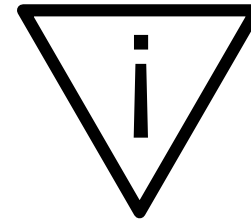

You are now the caretaker of a Genuine Matrix Buddy.

Matrix Buddies are electric creatures who live in special enclosures which protect them from earth's harsh magnetic field, while allowing them to perceive their surroundings and express their emotions. With proper care, your Matrix Buddy will prove to be a dependable companion.

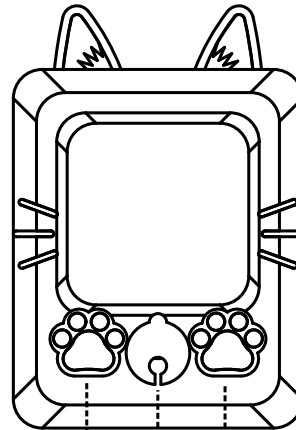

MATRIX BUDDY

While Matrix Buddies can hibernate indefinitely in their enclosures, they need to be supplied power for normal activity. Connect your Matrix Buddy to a powered USB port via the included cable and it should wake up immediately. Phone chargers and other USB power supplies work fine.

Worried about light pollution? Matrix Buddy can read the room! Sleep mode activates in near darkness. Press the left paw to configure it's light threshold. The light sensor is on the back, make sure it's not covered.

Light Sensor

USB Mini-B

Download the Matrix Buddy Link Program on your windows PC to connect a Matrix Buddy to any audio output. Give a face to those camera-off remote meetings, or let Matrix Buddy perform your favorite songs!
